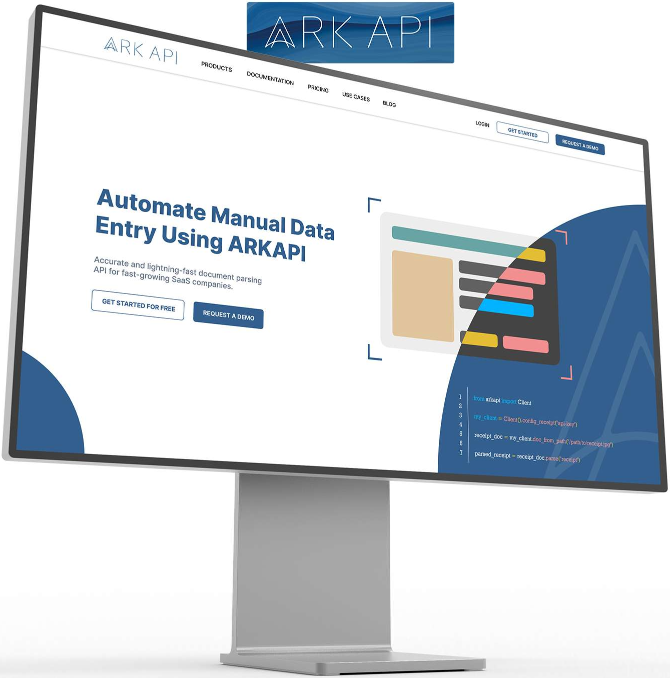
ARK API



Automate Manual Data Entry Using ARKAPI

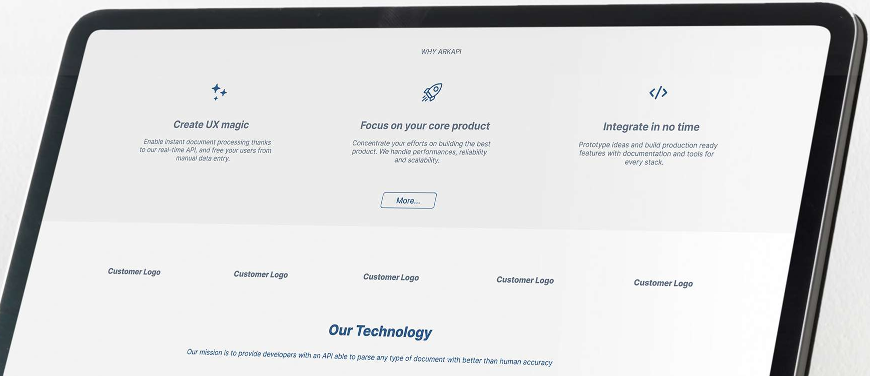
Accurate and lightning-fast document parsing API for fast-growing SaaS companies.

```python
from arkapi import Client

my_client = Client().config_receipt("api-key")

receipt_doc = my_client.doc_from_path("/path/to/receipt.jpg")

parsed_receipt = receipt_doc.parse("receipt")
```



WHY ARKAPI

Create UX magic

Enable instant document processing thanks to our real-time API, and free your users from manual data entry.

Focus on your core product

Concentrate your efforts on building the best product. We handle performances, reliability and scalability.

Integrate in no time

Prototype ideas and build production ready features with documentation and tools for every stack.

Our Technology

Our mission is to provide developers with an API able to parse any type of document with better than human accuracy
